Air pollution is a grave risk to human health (1). Ambient air pollution is by far the most important environmental risk factor for morbidity and mortality (2), and household air pollution follows closely (3). Air pollution affects nearly every organ in the body, causing or contributing to many illnesses (4, 5). Poor air quality is a challenge facing all people on the planet, with the greatest risk ...

A.D. 14, 15 Rome at the beginning was ruled by kings. Freedom and the consulship were established by Lucius

Brutus. Dictatorships were held for a temporary crisis. The power of the decemvirs did not last beyond two years, nor was the consular jurisdiction of the military tribunes of long duration. The despotisms of Cinna and Sulla were brief; the rule of Pompeius and of Crassus soon yielded ...

First book I tried to open randomly I got
jumped, then I tried to see if any of the
books looked differently from the others.
With your cursor over the books, they
have the top half of the pages gray, and
the other half white. The book that
contained the annals had both sets of
pages gray, I hope this can be of help to
anyone.

Outer space is the closest known approximation to a perfect vacuum. It has effectively no friction, allowing stars, planets, and moons to move freely along their ideal orbits, following the initial formation stage. The deep vacuum of intergalactic space is not devoid of matter, as it contains a few hydrogen atoms per cubic meter. By comparison, the air humans breathe contains about 10^{25} ...
