APC Function. Since an absence of functional APC protein leads to increased cell division, it stands to reason that the normal protein works to inhibit cell division in some way. This is indeed the case. APC protein forms a complex with beta-catenin, a transcription factor, leading to beta-catenin's degradation. In the absence of the APC ...

Is cancer biology different in older patients? - ScienceDirect

Hans Clevers is group leader at the Hubrecht Institute for Developmental Biology and Stem Cell Research and at the Princess Máxima Center for Pediatric Oncology. He is also University Professor at the University Utrecht and Oncode Investigator. The Clevers group studies the biology of Wnt signaling in tissue turnover and in cancer.

Clevers group - Hubrecht Institute

In biology, cell signaling (cell signalling in British English) or cell communication is the ability of a cell to receive, process, and transmit signals with its environment and with itself. It is a fundamental property of all cells in every living organism such as bacteria, plants, and animals. Signals that originate from outside a cell (or extracellular signals) can be physical agents like ...

Cell signaling - Wikipedia

Please choose the answer that best fills in the blanks of this sentence in the correct order. A molecular fragment of an antigen that serves as the primary signal that the molecule is foreign is called a(n) _____. whereas a small foreign molecule that can only elicit an immune response when linked to another larger molecule is called a(n) _____.

Microbiology CH 15 Flashcards | Quizlet

AP Biology is a serious course with a number course goals. According to the College Board's website, by the time students take their AP Biology exam (or the SAT exam) they should: Develop a conceptual framework of Biology as a science.
