M.A. in Deaf Education Studies - Gallaudet University

For the reasons mentioned above, children who are deaf or hard of hearing need maximum access to language. This includes being enrolled in early intervention programs that can provide them the foundations for a functional communication system (Easterbrooks & Baker, 2002, p. 91) and then an educational environment saturated with

The importance of parental involvement in language ...

The critical period hypothesis is the subject of a long-standing debate in linguistics and language acquisition over the extent to which the ability to acquire language is biologically linked to age. The hypothesis claims that there is an ideal time window to acquire language in a linguistically rich environment, after which further language acquisition becomes much more difficult and effortful.

Critical period hypothesis - Wikipedia

Cognitive, emotional and social functions in music perception and production. Listening to music requires certain perceptual abilities, including pitch discrimination, auditory memory, and selective attention in order to perceive the temporal and harmonic structure of the music as well as its affective components, and engages a distributed network of brain structures (Peretz and Zatorre, 2005).

Examples of success-oriented outcomes include, but are not limited to, greater academic performance, completion of high school, and life satisfaction. Both individual-level and group-level factors are discussed as contributing factors to students' levels of engagement in school. However, the present body of literature offers a range of mixed ...

Iowa Research Online

LANGUAGE AND COGNITION. Language development is intricately entangled with cognitive development. Much discussion and research have been devoted to the question of whether language is necessary for cognition (i.e., whether we need words and semantic structure to think) or whether language is merely an outcome or reflection of growth in mental ...

Fictional narratives cannot be considered as mere escapist entertainment, and have a significant social cognition potential. Their study is also important in understanding the mechanisms of behavioral change, as many fictions focus on processes of personal transformation of the main characters. Romantic fictions are of special interest in this regard, as the formation of a new couple entails ...

Research into great ape language has involved teaching chimpanzees, bonobos, gorillas and orangutans to communicate with humans and with each other using sign language, physical tokens, lexigrams, and mimicking human speech. Some primatologists argue that these primates' use of the communication tools indicates their ability to use "language", although this is not consistent with some ...
