The increased-breathing response to exercise helps to counteract the pH-lowering effects of exercise by removing  $CO_2$ , a component of the principal pH buffer in the blood. Acidosis that results from failure of the lungs to eliminate  $CO_2$  as fast as it is produced is known as respiratory acidosis .

Exercise. We will be using a database with data about some of Pixar's classic movies for most of our exercises. This first exercise will only involve the Movies table, and the default query below currently shows all the properties of each movie. To continue onto the next lesson, alter the query to find the exact information we need for each task.
