MET Chapter 13 Metal Rolling Processes and Equipment

...

John G. Lenard, in Primer on Flat Rolling (Second Edition), 2014.
9.9.2.1 Cold Rolling. When analysing the flat rolling process of cold rolling steel strips without lubrication, the magnitude of the coefficient of friction is likely to be in the range of 0.15–0.4. If efficient lubricants or emulsions are used, the coefficient drops to 0.05–0.15; use the lower values when the thickness of ...

Tube, Pipe, Angle and Flat Bar Rolling & Bending Machines

Rolling pass schedules leading to round stock generally employ sequences of ovals and rounds, such as illustrated in Figure 17.2. 208 The alternating geometry ensures that the width of the entering rod section is less than the width of the emerging rod section, which is necessary for roll entry. As a practical matter, actual rod cross sections may be “out of round” and not rigorous ovals.

Rolling Pass - an overview | ScienceDirect Topics

13.19 Make a list of some parts that can be made by (a) shape rolling and (b) thread rolling. Parts that can be made by shape rolling include railroad rails, I-beams, and other structural channels. Note that there is a similarly-named process for sheet metals described in Section 16.6 on p. 403-404 which uses sheet metal workpieces and can be used for gutters as well as some structural channels.
