Game Theory [Answers] - Solution manual Strategy - ITD20 ...

Solution: From theory $S_1 = \operatorname{argmax} \min u_1(s_1', s_2)$
 $p = \text{probab. 1 plays L}$ If $p > 1/2$, $s_2 = R$ leads 1 to earn $1 - 2p < 0$; - If $p < 1/2$, $s_2 = L$ leads 1 to earn $2p - 1 < 0$; - If $p = 1/2$, then regardless of 2's strategy 1 earns 0. - Thus $p = 1/2$ is the maximin strategy 1.

Answer: Game Theory - 24HourAnswers

In game theory, a solution concept is a formal rule for predicting how a game will be played. These predictions are called "solutions", and describe which strategies will be adopted by players and, therefore, the result of the game. The most commonly used solution
