Perioperative Standards And Recommended Practices

The perioperative period is the time period of a patient's surgical procedure.It commonly includes ward admission, anesthesia, surgery, and recovery.Perioperative may refer to the three phases of surgery: preoperative, intraoperative, and postoperative, though it is a term most often used for the first and third of these only - a term which is often specifically utilized to imply 'around' the ...

Perioperative - Wikipedia

The Accreditation Assistant is designed to improve the quality of a facility's survey preparation and save staff time by aligning each of the accreditation standards with the specific AORN Guideline recommendations, policies & procedures, competencies, and other tools that apply to the specific elements of that standard. The Accreditation Assistant is available for:

care, as identified by the AORN standards and recommended clinical practices (AORN, 2012). evaluation 27. In the final evaluation stage of the nursing process, the perioperative nurse evaluates the results of nursing care in relation to the extent that expected patient outcomes have been met. Nursing Process Throughout the Perioperative Period 3

Introduction to Perioperative Nursing

Nursing has always sounded like an appealing profession. You get to help people, it's a well-respected field, the earning potential is solid and the path to becoming a nurse is relatively short compared to some other healthcare careers.
