Compliance is a major topic of interest within the field of consumer psychology. This specialty area focuses on the psychology of consumer behavior, including how sellers can influence buyers and persuade them to purchase goods and services. Marketers often rely on a number of different strategies to obtain compliance from consumers.

The Psychology of Compliance - Verywell Mind

Operant conditioning is a method of learning that occurs through rewards and punishments for behavior. Through operant conditioning, an individual makes an association between a particular behavior and a consequence. B.F Skinner is regarded as the father of operant conditioning and introduced a new term to behavioral psychology, reinforcement.

There are few studies in the history of psychology as renowned as the Stanford prison experiment (SPE) (Haney, Banks, & Zimbardo, 1973), and few psychologists as recognizable as the study's principal investigator, Philip Zimbardo. The SPE has influenced music, film, and art and has served as a testament to the power of "bad" systems and a counterbalance to "bad" person accounts of ...

In 1937, the psychoanalyst (as well as a physician, psychologist, and psychiatrist) Heinz Hartmann marked it as the evolution of ego psychology by publishing his paper, "Me" (which was later translated into English in 1958, titled, "The Ego and the Problem of Adaptation"). Hartmann focused on the adaptive progression of the ego "through the mastery of new demands and tasks".

Dissociation is commonly displayed on a continuum. In mild cases, dissociation can be regarded as a coping mechanism or defense mechanism in seeking to master, minimize or tolerate stress - including boredom or conflict. At the non-pathological end of the continuum, dissociation describes common events such as daydreaming. Further along the continuum are non-pathological altered states of ...
